

ENRICHMENT WEEK

10TH-14TH JUNE 2019

Enrichment Week

Monday 10th June 2019 was the start of our Curriculum Enrichment Week where pupils are given the opportunity to participate in a variety of workshops and activities.

Monday - Multi-Faith/Multi-Culture Day

We were very lucky to have the expertise of some of our wonderful parents to make this day the huge success it was. Along with Avenue Staff these ladies made a number of Asian dishes for everyone to taste.

Henna painting was also on offer and the designs were absolutely amazing!

Music filled the air and Greek Dancing was a sight to behold!

Stories and dressing-up in costumes from different cultures was available in the library area and was a great hit with the pupils.

Enrichment Week

Tuesday - Careers and Enterprise Day

On Tuesday 11th June, as part of our Enrichment Week, we held our first Careers and Enterprise Day. The day was designed around each of our three pathways, Nurture & Engagement, Life Skills and Academic.

During the day we had lots of different workshops from Forensic Science, Enterprise Activities and a Career Conference. We also created our own pop-up shop selling snack bags that Students from Swift Class had prepared, and Eagles Class made scones and sold them to staff adding jam and cream if desired. Delicious!

Nuthatch and Merlin classes had a robotics day where they created their own robots using iPads and then launched them onto a planet to see how they would perform.

Some of our younger students enjoyed dressing up in work Related uniform or chose to relax in a sensory tent.

Enrichment Week

Wednesday - Maths Day

On Wednesday it was Maths Day. All of the classes enjoyed "What's The Time Mr Wolf" with Geraldine leading the event.

There was also a Scavenger Hunt on the Sensory Trail, Dance in The Square with Hayley and some classes had Music with Tom Stobie.

The day finished with an aeroplane competition.

Enrichment Week

Thursday - Science Day

Science day was a huge success! Everyone was incredibly engaged in exploration, experimentation and excitement!

In the kitchen we used liquids of different densities to make rainbow towers, as well as looking at the diffusion of colour which occurs when skittles are arranged in water - the magic happened before our very eyes!

In soft play there was an opportunity to observe forces, with toys to push and pull down the ramp.

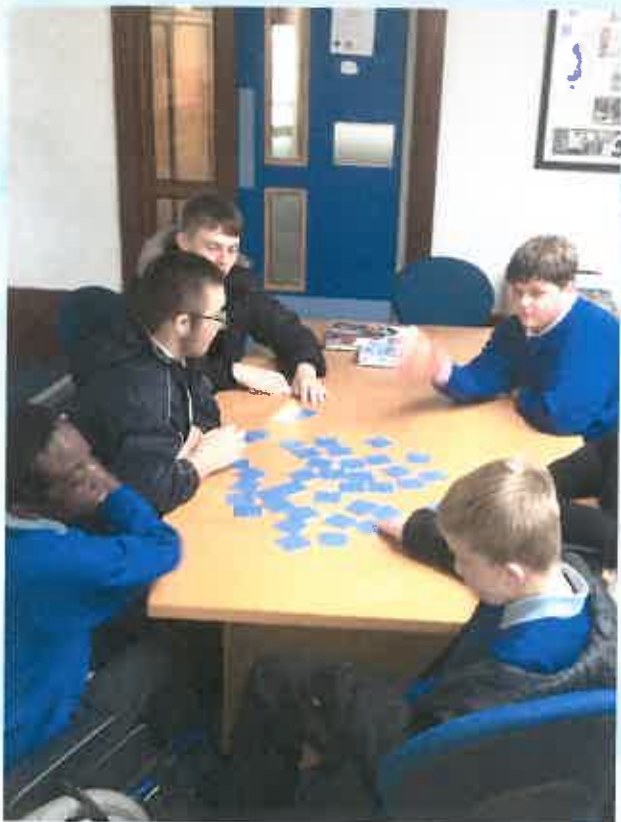

Light and shadow play was available in the sensory room, and memory games were laid out in the library.

Students had an opportunity to test their fitness in the sports hall, completing a circuit and monitoring their pulse rates.

Further up the school, the students had the opportunity to conduct their own experiment in order to test which fizzy drink contained the most carbon dioxide. They concluded that Dr Pepper produced the most gas - consume at your own risk!!

Enrichment Week

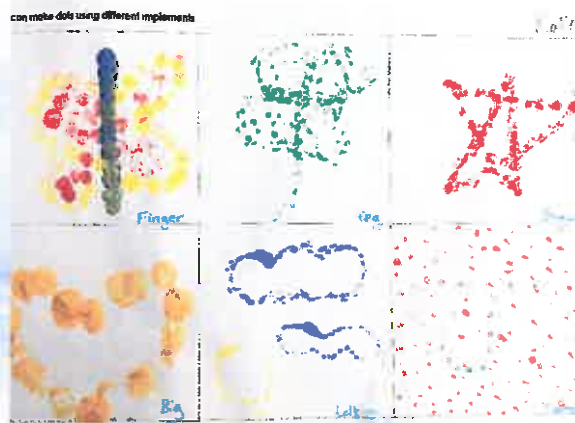

Friday- Art Day

Arts Day on the Friday of Enrichment Week saw many activities on offer. There were Printmaking videos to watch for mono-printing and texture block printing.

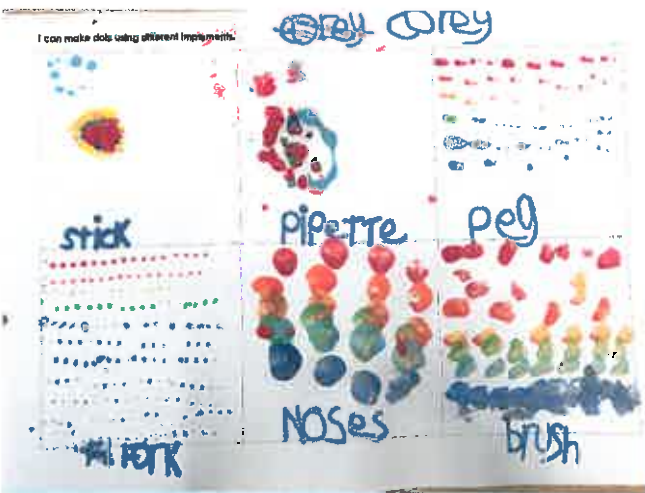

There was music in The Square, junk instruments to make ready to perform in the afternoon's assembly and sensory stories to enjoy and Pointillism to learn about and try out!

That wasn't all! A blanket was knitted for Diego and there was a pop-up 'Photo-Me' stall by the library.

There was a real buzz in the air as the art equipment sprang into action and students enjoyed the full range of expressive arts.

Friday - Art Day

ART GALLERY

Friday - Art Day

The Avenue School showcased a selection of outstanding artwork produced by all students during this academic year.

We believe that working through the Arts is important and helps our students to appreciate the world around them, their colours and shapes and how these can be interpreted and represented in different ways.

We also enjoy listening to and creating our own music.

Each class has learnt about different artists and techniques using this learning to inspire themselves and to create their own artwork.

All students have been proud to display it in our school exhibition.

Enrichment Week Assembly

On Friday afternoon pupils and staff gathered in The Square to celebrate the end of a wonderful week of activities and events.

As you can see from the lovely photographs on the previous pages the pupils were involved in Multi-Faith/ Multi-Culture, Art, Music, Sensory stories, Maths, Science and Careers and Enterprise activities.

At the end of the assembly the choir led everyone in Singing and Makaton signing to Robbie William's "I Love My Life" with Tayvon, Amer and Lucy performed solos.

A fitting end to a wonderful week!

Below is the certificate that some pupils were awarded for amazing achievements and great work during the week.

Enrichment Week

Thank you to all pupils, staff and parents who helped make Enterprise Week such an amazing success!

It will be extremely difficult to make next year's any better but I'm sure everyone will give it a go!

Sky's
the
Limit!
